Adhesives in Industry: Holding it all Together!

Ged McGurk

**Technical Director
Engineering Adhesives
Henkel Limited**

**Tuesday 10th March 2009, 5:30pm
Centuria Building, Teesside University**

Modern adhesives are used in enormous variety of industrial applications and yet many Engineers still perceive them to belong to the school of bodge-it Engineering practice. From the world of micro-electronics to large scale engineering construction this lecture will illustrate the versatility of modern adhesives technologies and highlight the technical advantages in industrial applications. The lecture will review common adhesive types and highlight their significant characteristics and fundamental limitations. .
